

ThermaPro Decking

Thermally-modified wood is environmentally safe, renewable, and performs better than commonly used pressure treated wood. Thermal modification turns wood into a vastly improved outdoor construction material that is stronger and more weather-resistant so it combats rotting, warping, cupping and twisting. ThermaPro decking is prefinished with Cutek Extreme Clear Wood Preservative.

-  Eco-Friendly
-  Sustainable
-  Chemical-Free
-  Rot Resistant
-  Insect Resistant
-  Dimensionally Stable

Decking Products	Nominal Dimensions	Net Dimension	Length in Feet
